

I would be very surprised to learn that the FCC was made up of such ignorant people as it would take to even suggest the idea of recording everything placed on the air every day! I respect the FCC far too much to believe that can even be remotely true. If that were to be the case somebody at the Commission is in bed with somebody who sells broadcast recording equipment and MAJOR data storage. It can't be possible, I refuse to believe that anyone is that ignorant. Greg Wennes,  
...in radio since 1967, and STILL IN IT unless something like that were to happen!
